SOURCE METHOD EXEMPTION 3B2B  
NAZI WAR CRIMES DISCLOSURE ACT  
DATE 2005

Except for the following possible traces, Frankfurt files contain no additional information on subject.

- a. (Dr.) Erik von SIVERS is a Hochschulprofessor, Marienplatz, Stuttgart. He is connected with a Wilhelm KIEFER who is thought to be in French Intelligence. (EGNA-106, 19 Sept 52) Possible Trace
- b. Erich von SIVERS lives at Fundeneschaftsstelle, Duostere Eicheweg 28, Goettingen. He is head of the Goettingen Branch of DTLINEN and is one of the founding members of the "Aktionsgemeinschaft Eiserner Vorhang"; he is responsible to the leader of DTLINEN in West Berlin and also works closely with the Kaiser Ministry. (EGNA-1151, 9 Feb 53) Possible Trace
- d. Erich SIVERS is a member of the SPD with KPD sympathies. (This is carded information from Counter Intelligence Summary, dated 5 Jan. 1950, from 66th CIC Detachment)
- e. Willi? SIVERS was born c1905-10 and is probably a Hamburg native; over 6' tall; good looking; dark hair and eyes; ruddy face; rather small nose; walks with a stoop, probably because of his height. Subject was a communist seaman who came to Hamburg in 1932 off a "Papag ship. He never did any overt work for the EV or for the Interclub, but was immediately claimed by the Marx group. He showed up occasionally at the Interclub for Saturday evening dances; was well-dressed and had money, a good indication that he was doing conspirative work for Marx. He was far more intelligent than the run-of-the-mill-workers in the harbor areas. (This is carded information extracted from the Interrogation of Richard KIERES, alias JAN VALTIN, Report No. B-644-50, dated 23 May 1950.)
